

Product safety data sheet

HIRSCH Armbänder GmbH - Focus on quality and safety

1. General information

HIRSCH focuses on high quality bracelets, as these are in direct contact with the skin and must fulfill the highest demands. In addition to aesthetic excellence, functional requirements also play a central role: Precise manufacturing and modern technologies ensure technical perfection, exact dimensional accuracy and minimal tolerances. HIRSCH bracelets meet the strictest quality and safety requirements.

2. components and material properties

Buckle:

- Made from high-quality stainless steel
- The nickel emission is below the legal limit of 0.5 µg/cm² (according to EN1811), which significantly reduces the risk of skin reactions.

Leather:

- Quality of the leather: The leather used is made from high-quality raw materials. Specially developed to ensure skin-friendliness, robustness and a long service life.
- Natural variations: Colour differences in the leather result from the unique structure of the natural material and do not constitute a defect.

Caoutchouc:

- The material is characterized by its dimensional stability, high elasticity and particular tear resistance.
- It is extremely robust and hard-wearing, which guarantees a long service life.
- Our products are waterproof, latex-free and insensitive to external environmental influences.
- It is ideal for sensitive skin and can also be used without hesitation by people with latex allergies.
- Cleaning is very easy and can be done with warm water and mild soap.

Our products are generally suitable for sensitive skin. However, the following points should be noted:

- Allergies and intolerances: Some people may react to certain ingredients.

If allergic reactions are suspected, a healthcare professional should be consulted. Diagnostic tests can clarify whether an allergy or intolerance is present.

3. compliance with international standards

CITES conformity:

- Use of leather from species-appropriate husbandry, controlled hunting stocks or strictly regulated according to CITES agreements.
- All imports, exports and re-exports of exotic materials are carried out in accordance with CITES documentation.

REACH regulation:

- Ensuring a high level of protection for people and the environment by complying with EU REACH regulations.
- No processing or use of chemicals without legally required registration and risk assessment.

ISO 9001:

- Certified according to ISO 9001.
- Permanent control of the entire value chain.
- In-house test laboratory in the company.

AQC:

- HIRSCH is a founding member of the AQC (Association pour l'Assurance Qualité des Fabricants de Bracelets Cuir) and is committed to: Traceability and quality assurance of leather bracelets.
- Regular audits to verify social responsibility and sustainable practices.

HIRSCH guarantees durable, safe and aesthetic bracelets that meet the highest international standards.

Quality you can trust!
